Front End Developer with a background in fast-paced startup environments and FinTech. With a tendency for growth, ready to leverage in developing and launching web applications, components, platforms, and forms to drive user interaction and data validation in innovative banking applications. Able and willing to work in cross-disciplinary teams of Tech members, finance experts, and non-tech professionals.

React | Angular | Vue | TypeScript | JavaScript | ES6 | ES7 | HTML | CSS | Redux | Jotai | Cypress | Material UI | Bootstrap | Mantine | Strapi | AWS | Git | Gitlab | Jira | Agile & Scrum | Swagger and Postman API

WORK EXPERIENCE

Front end developer Jul 2023 – Nov 2023
Ambrosys GmbH – A research company focused on AI, Data Science, and Software Development Berlin, Germany

- Developed and launched a user-friendly web application with **React** and **TypeScript**, creating a platform tailored for farmers to seamlessly upload cow data and access features for optimizing cow mating
- Improved application reliability by implementing automation testing using **Cypress**
- Ensured Content Management System (CMS) integration by managing content through **Strapi**
- Demonstrated expertise in version control such as **Git** and **Gitlab**

Front end developer Jan 2022 - Jun 2023
TOSAN - A Banking and Payment Solutions Provider Tehran, Iran

- Designed and implemented dynamic forms tailored for the banking sector, enhancing user interaction and data validation with **Angular** and **TypeScript**
- Developed modular and scalable components, fostering parallel development and efficient communication between elements for a cohesive banking application through a **micro front-end** approach
- Refactored old components to new components which increased the efficiency of the app by 15%.
- Streamlined API development by being proficient in **Swagger API** and **Postman API** and utilized **Jira** for project management and issue tracking.

Front end developer Jun 2021 - Nov 2021
Mabato Tehran, Iran

- Completed a 6-month internship and collaborated closely with UI/UX designer and product owner to translate business and user requirements into solutions.
- Created a web application using **React** and **Material-UI (MUI)** that emulated the functionality of a popular photo-sharing platform, complete with user profiles, and interactive engagement features
